

# DARK GREY MATT FILM

## PRODUCT SHEET

DARK GREY MATT projection film is a high-contrast cinema projection film made with multi-reflective material layers and diffusers. It boasts 2x higher brightness compared to a standard matt white projection screen while maintaining a wide viewing area.

### Contrast and True colours

Thanks to many years of experience and feedback from our clients, we can confidently confirm what we already told to the clients during their decision-making process between white/grey, that our DARK GREY MATT film is the right one for true reproduction of the entire colour spectrum - including black and white.
