

# UST GREY FILM

PRODUCT SHEET

The ULTRASHORT GREY foil sets the trend of the current use of projectors with ultra-short rear projection. High-quality contrast image in all positions and the possibility of use on large projection screens with 4K quality display.

## More than a TV

The purchasing cost of a set containing a projection screen of over 100" and a FHD or 4K projector is considerably lower compared to large-format displays or TVs, and the projection can be completely frameless.
